

SPRING _ ANNUAL VEGETABLE TRANSPLANT LIST _ 2020

This list represents the majority of crops and varieties we have growing on the benches of our greenhouse grower's tables. If you do not see something you're looking for, ask us; we still may have access to it & could get something special for you if supply allows.

Of course, mother nature is in charge of when these plants will land on our doorstep. Exact arrival dates will vary. In the interest of communication and garden planning for 2020, take a peek at what we anticipate to receive this growing season.

We will also continue to work with J&B HERB FARM for 2020; this list does not reflect what they will be able to supply us... stay tuned to the greenhouse to see what's in store from them this year!
